

# C0885: PROJECT RESEARCH

INVESTIGATING INTO METHODS FOR NEUROLOGICAL DISEASE

by Pierre-Marie DANIEAU (group 82)

# WHY ?

- Some neurological disease are not curable yet.
- Touch a lot of people
  - *520.000 Alzheimer & 145.000 Parkinson in UK*
- No tools to help them or the family (volunteers, assistants, ...)

# WHAT ELSE ?

- Detection of the disease.
- Prediction of stroke / health issue.
- Everyday help from tools.

# HOW ?

- Research on existing tools / research / therapy.
- Research on physical device
- Building a prototype
- Test on volunteer.

# AFTER ?

- Improving the prototype according to the results.
- Commercialization
